

Main Features

Stainless steel, hermetically tight solder version

- High connection strength
- High corrosion resistance
- Capillary tube joints of high strength and vibration resistance

Bimetal connections

- Straightforward and fast soldering (no wet cloth or refrigeration pliers required).

Laser-welded **power element** in stainless steel

- Longer diaphragm life
- High pressure tolerance and working pressure
- High corrosion resistance

Compact design

- Small dimensions and low weight

Can be supplied with **MOP**

(Maximum Operating Pressure)

- Protects the compressor motor against excessive evaporating pressure during normal operation

TUBE Thermostatic Expansion Valve

Achieve the highest precision flow control - regardless of the system conditions

Wide range of thermostatic expansion valves

Future proof

Qualified for
A2L and natural
refrigerants

Choose the optimum solution

		Type	TD1 series	T2 series	TUA series	TUB series	TCAE	TCBE	TR6 ⁽⁵⁾	TGE series	TE 5 - TE 55 series
			• Designed for small applications • Wide temperature range	• Standard valve for multiple applications	• Compact design and light weight • With steel / copper bi-metal connections for fast soldering		• Compact design and light weight • With steel / copper bi-metal connections for fast soldering		• Compact design and light weight • With steel / copper bi-metal connections for fast soldering	• With dual diaphragm for long lifetime	• Supplied as Parts programme - element, orifice and valve body
Main applications	A/C Systems										
	Transport Refrigeration										
	Display Cabinets										
	Ice Making Machine										
	Water Chiller										
	Cold Room										
	Heat Pumps
