

# SUNISO<sup>TM</sup> GS

WORLD-LEADING REFRIGERATION LUBRICANTS

## Introduction

**Suniso® GS** oils are premium quality, highly-refined mineral refrigeration lubricants designed to lubricate refrigeration and air-conditioning compressors using CFC and HCFC refrigerants. Suniso GS lubricants are known for their low wax content, low pour point and high dielectric strength. For over 50 years, Suniso GS lubricants have helped to ensure trouble-free operation and maximum service life with excellent chemical and thermal stability.

## Applications

**Suniso GS** lubricants are recommended for use in consumer and commercial refrigeration and air-conditioning systems charged with traditional and natural refrigerants. Suniso GS lubricants are ideally suited for low-temperature systems where evaporator temperatures are as low as -42°C/-44°F. Suniso GS lubricants are designed for use with CFC refrigerants (e.g. R-11, R-12, R-13, R-113, R-114, R-115) and HCFC refrigerants (e.g. R-21, R-22, R-123, R-124, R-141b, R-142b, R-502). They are also suitable for use with natural-type refrigerants, including ammonia (R-717), isobutane (R-600a) and propane (R-290).

## FEATURES & BENEFITS

### LOW WAX CONTENT & LOW POUR POINT

Excellent low-temperature performance with no wax deposits to plug the system.

### HIGH DIELECTRIC STRENGTH/GOOD ELECTRICAL INSULATING PROPERTIES

Suitable for hermetically sealed compressors (electric motor and windings exposed to refrigerant and oil).

### EXCELLENT CHEMICAL STABILITY

Does not react with refrigerant or metal components in the system, extending machine service life and reducing maintenance costs.

### HIGH THERMAL STABILITY

Cleaner operation of the compressor with minimal deposits and failures due to valve sticking.
